

**Subject : Mini Project - COM-612**

# **Intrusion Detection in Home Automation Using Computer Vision and Honeypots**

**Project Name : Chakravyuh**

**Project Description :** A state of the art Intrusion Detection Framework that secures network as well as parameter by using honeypot technology and computer vision integrated into a centralized smart notification IOT system.

**Team Leader : Aadhaar Koul (2020a1r040) - CSE**  
**Team Member 1 : Arjun Charak (2020a1r058) - CSE**  
**Team Member 2 : Baseer Fatima (2020a1r045) - CSE**  
**Team Member 3 : Novneet Kour (2020a1r048) - CSE**

# Problem

Cyber crime now a days is booming at an alarming rate. The Nieviness and the lack of awareness among the users has increased the rate of cyber crime by a large number. The Most common attacks to which the users are most succceptible are the phishing and the MITM(Man In The Middle Attacks) that are usually carried out on the free public wifi's and home gateways.

## Problem 1

People dont really care about their online activities and the cyber crimes untill they encounter one.

## Problem 2

Users dont have access to the heavy hardware and software to protect themselves in the online jungle.

## Problem 3

There are different kinds of cyber attack techniques and no one stop solution.

# Global Cyber Landscape

## Global Cost

An estimate of about **10.5 Trillion Dollars** is the round figure that cyber frauds are going to cost the world in the coming years.

## Accessibility

Only the Big Data companies and large scale industries use advance methods and protocols to detect and deal with a cyber crime.

## Emerging Trends

With the advancements in technology and security measures , the hackers are also evolving and developing better and stealthier malwares.

# Solution

One stop Intrusion Detection System

## Solution 1

Development of an advanced intrusion detection networking system, automation, and notification system using the latest Computer Vision and Honeypot technology.

## Solution 2

Creating a hardware and software solution that accurately classifies the level of intrusion in a premises or Local Area Network/Wide Area Network.

## Solution 3

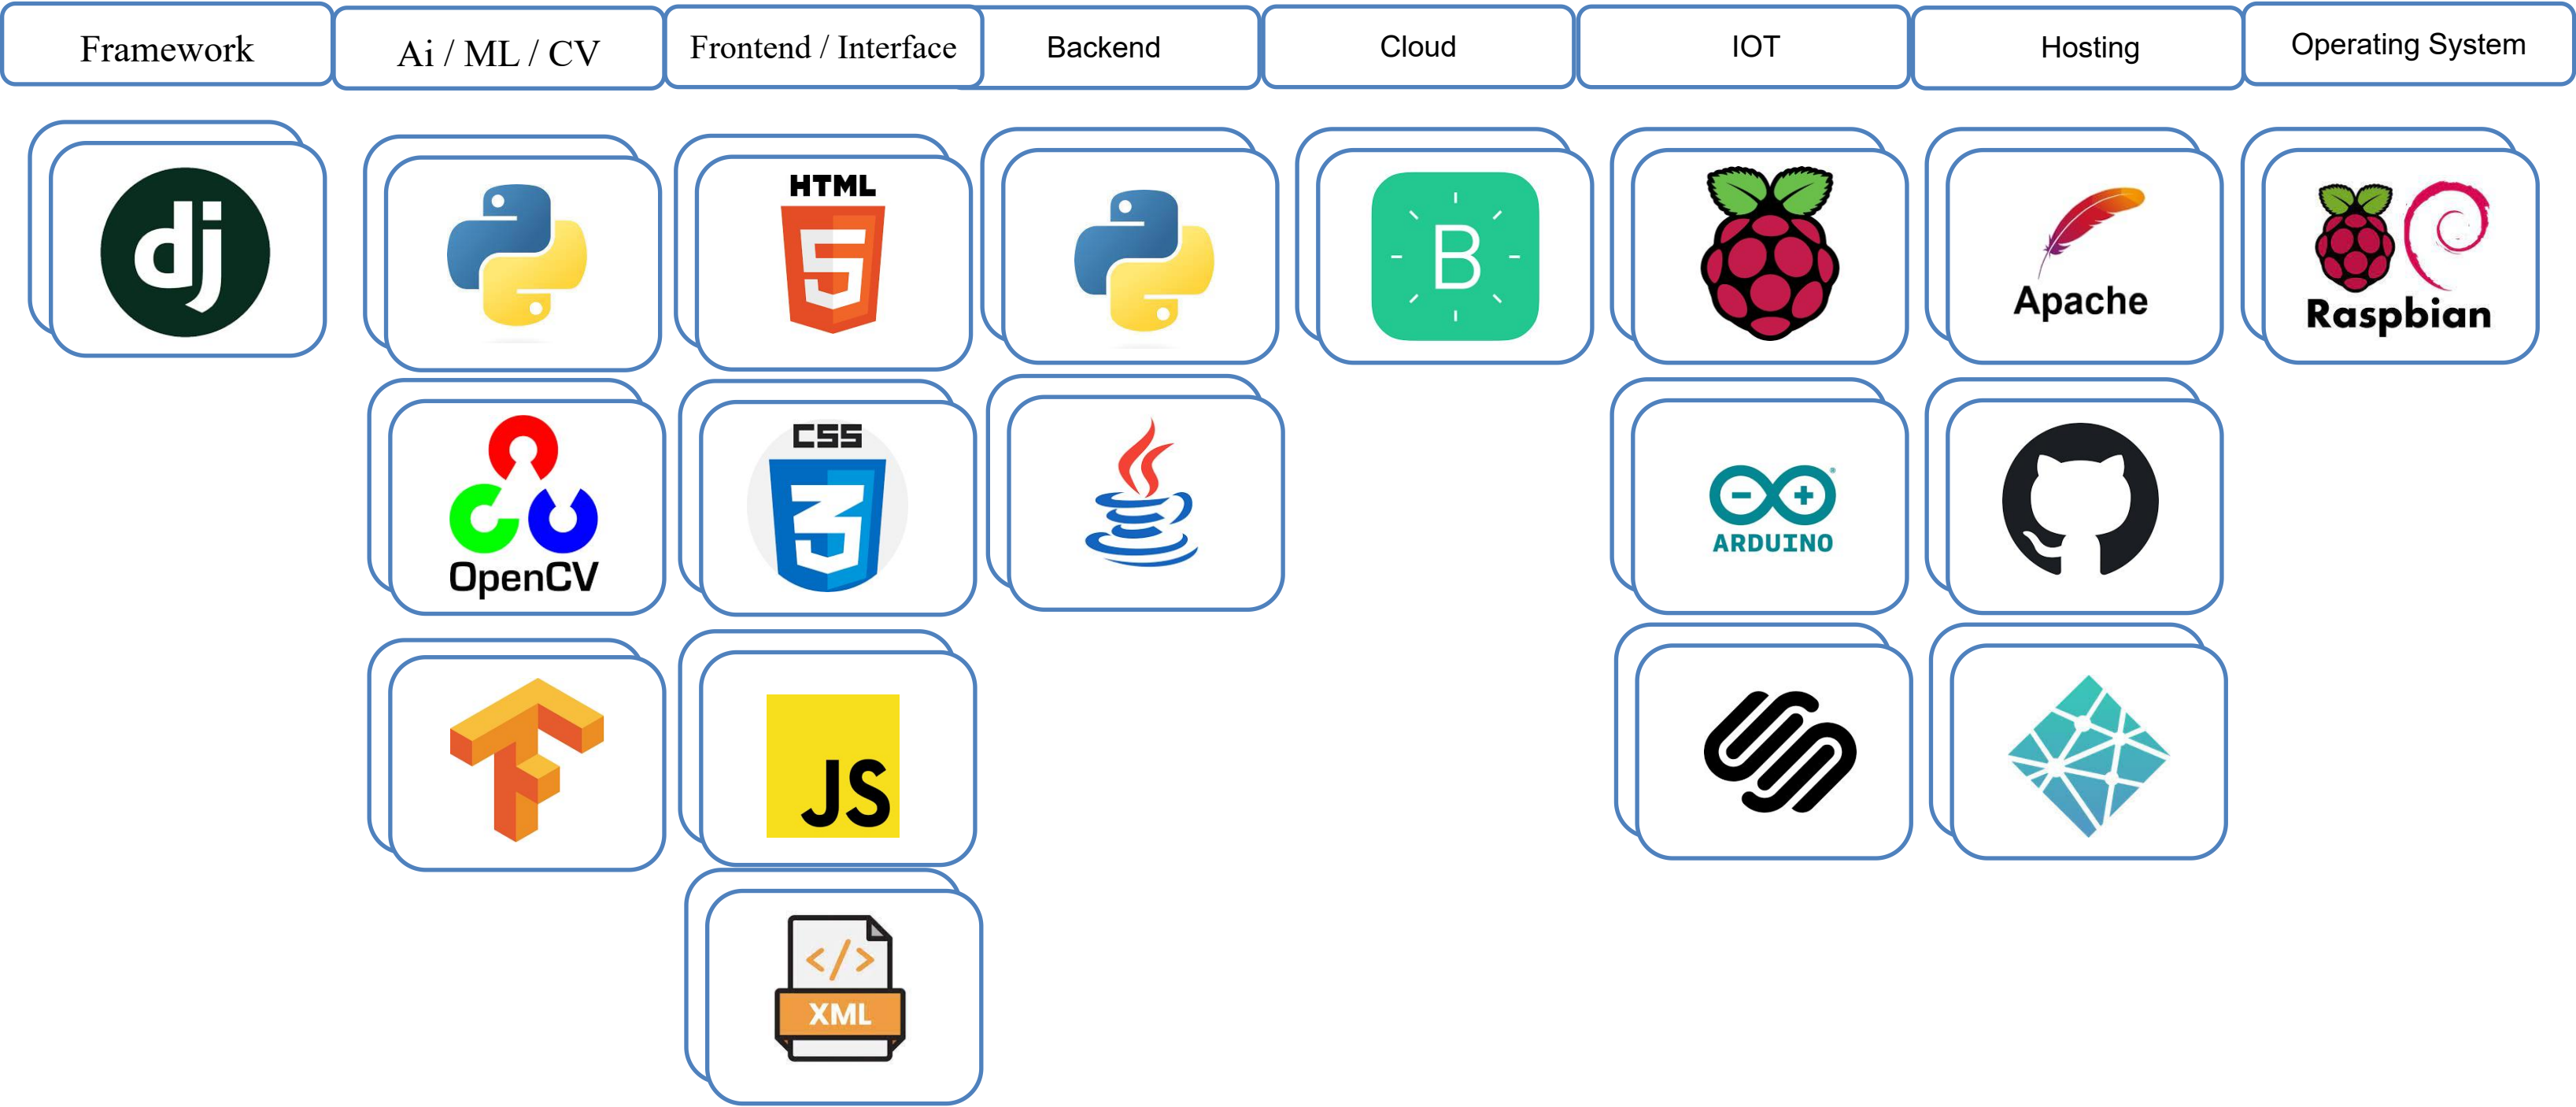

Design and implementing an IoT-based locking system that prevents unauthorized access to the property using Computer Vision and Neural Networks framework.

## Solution 4

Making the solution available to a common man by using low cost, efficient hardware that provides the same set of functionalities that of a large scale IDS.

# TECH STACK

# LANGUAGES

For Django App Deployment  
and database

For Django app deployment and ,  
dashboard development

For IOT and centralized smart  
notification system

For Android App Development  
and integrations

For Django deployment and ,  
dashboard development

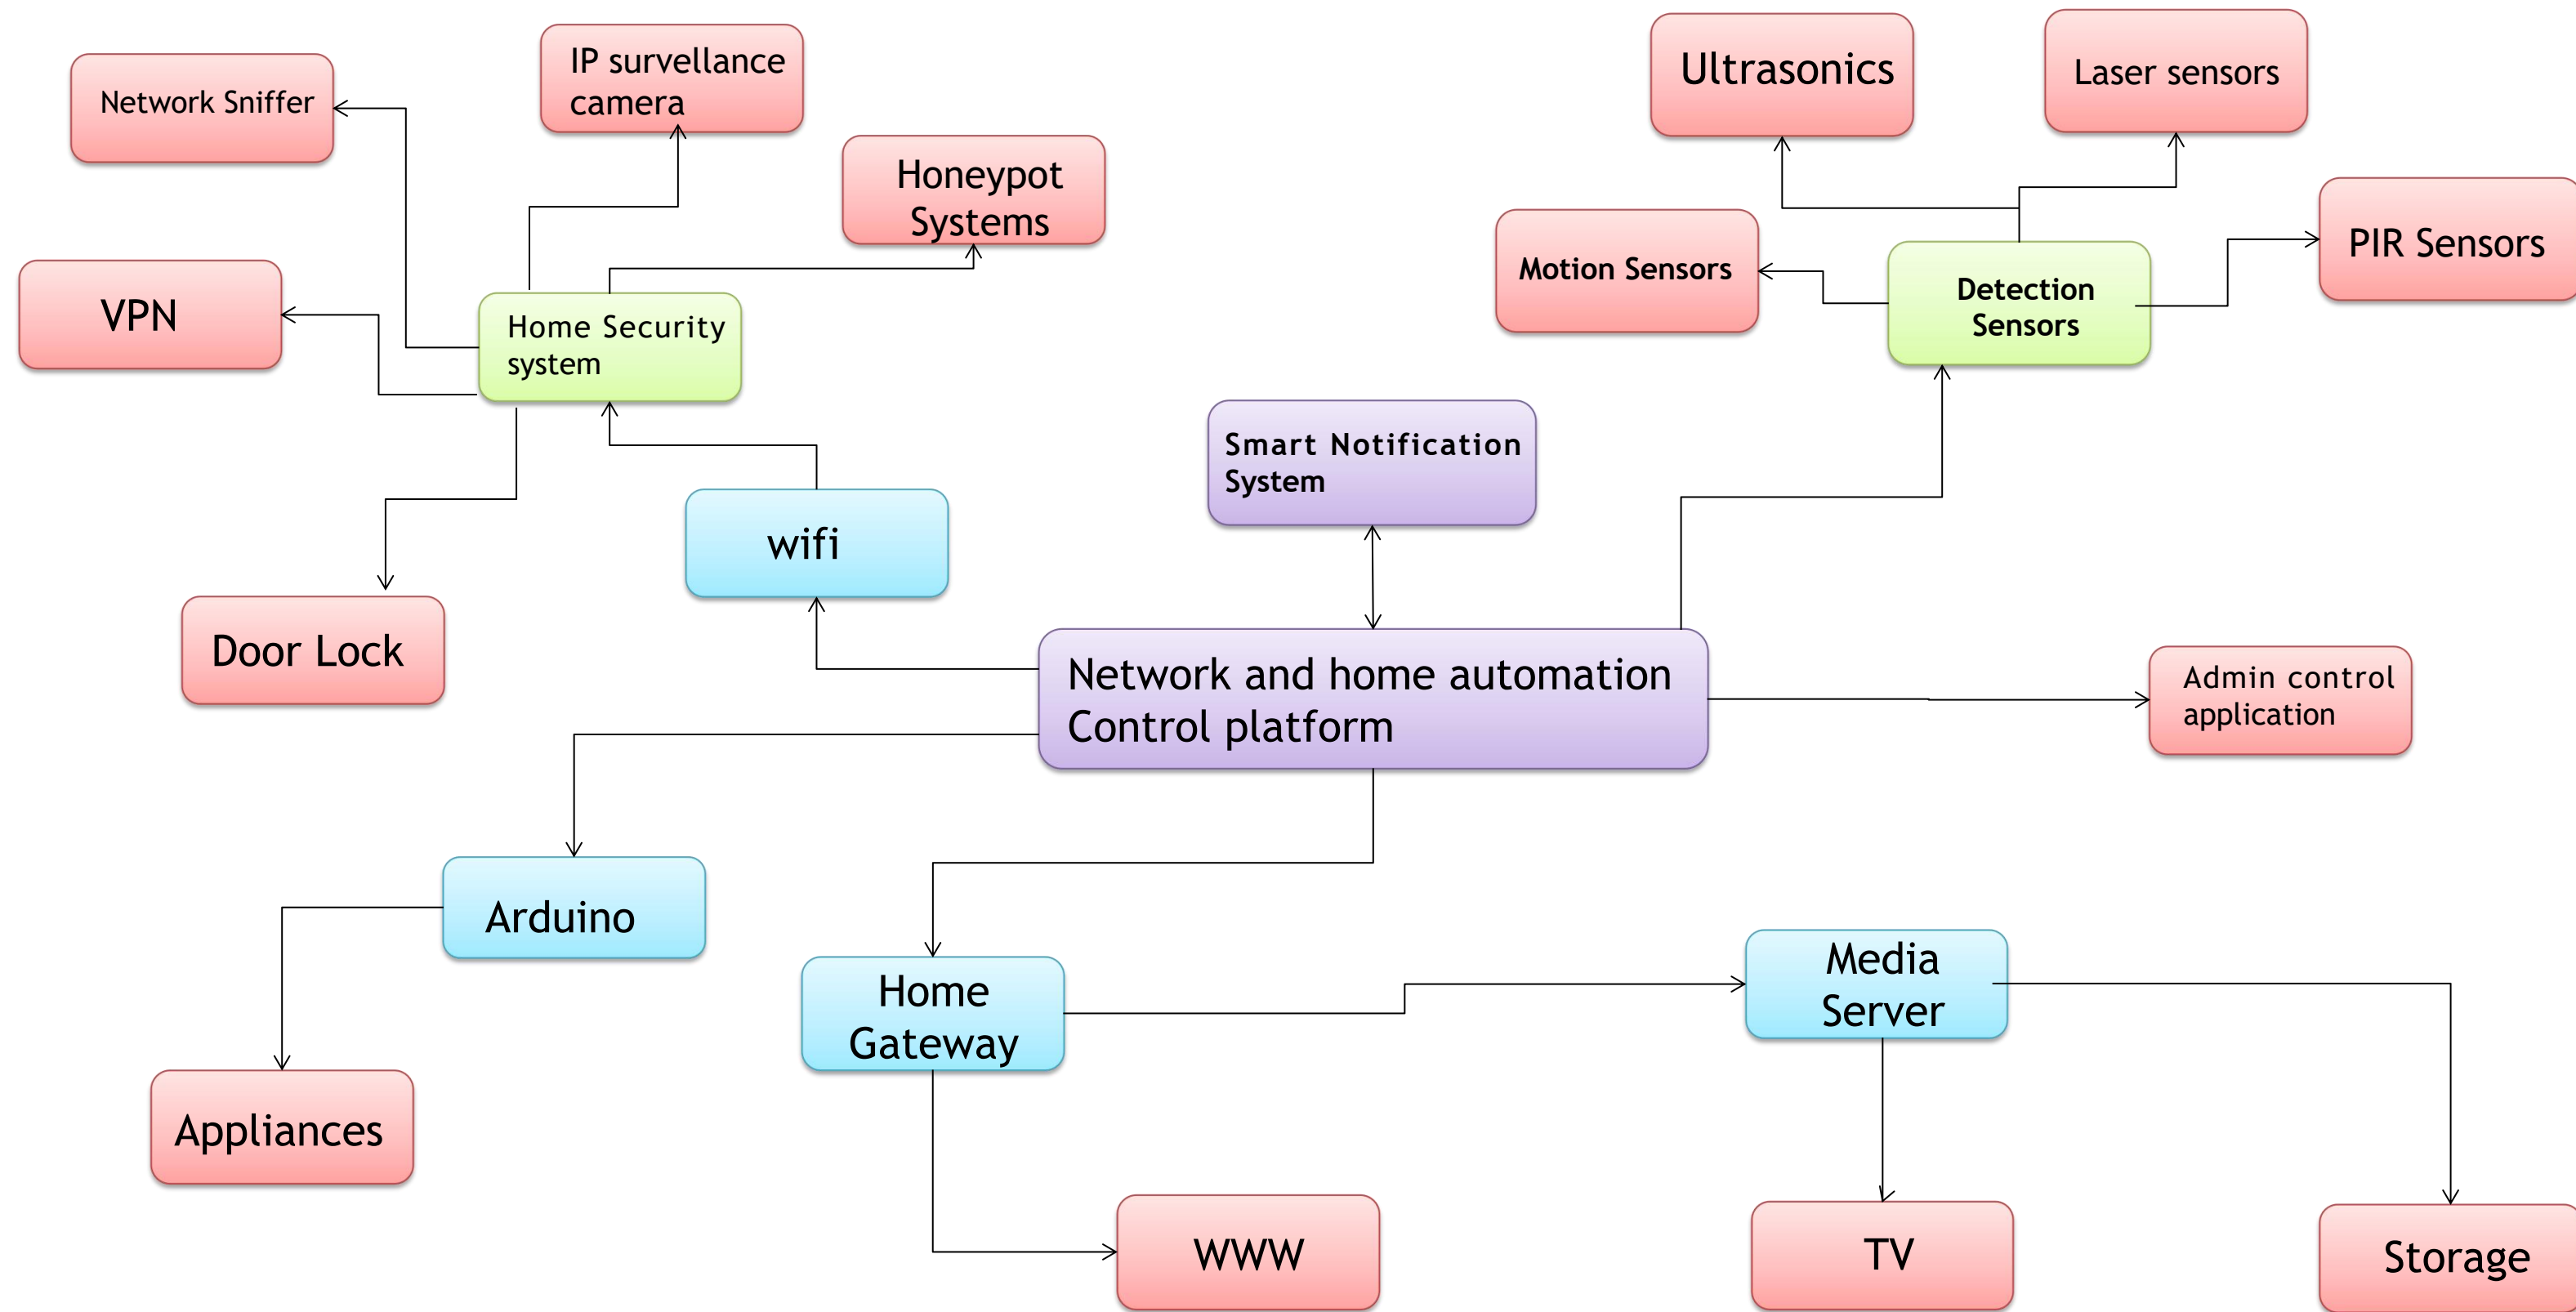

For Android App Interfaces

For web portal interfaces

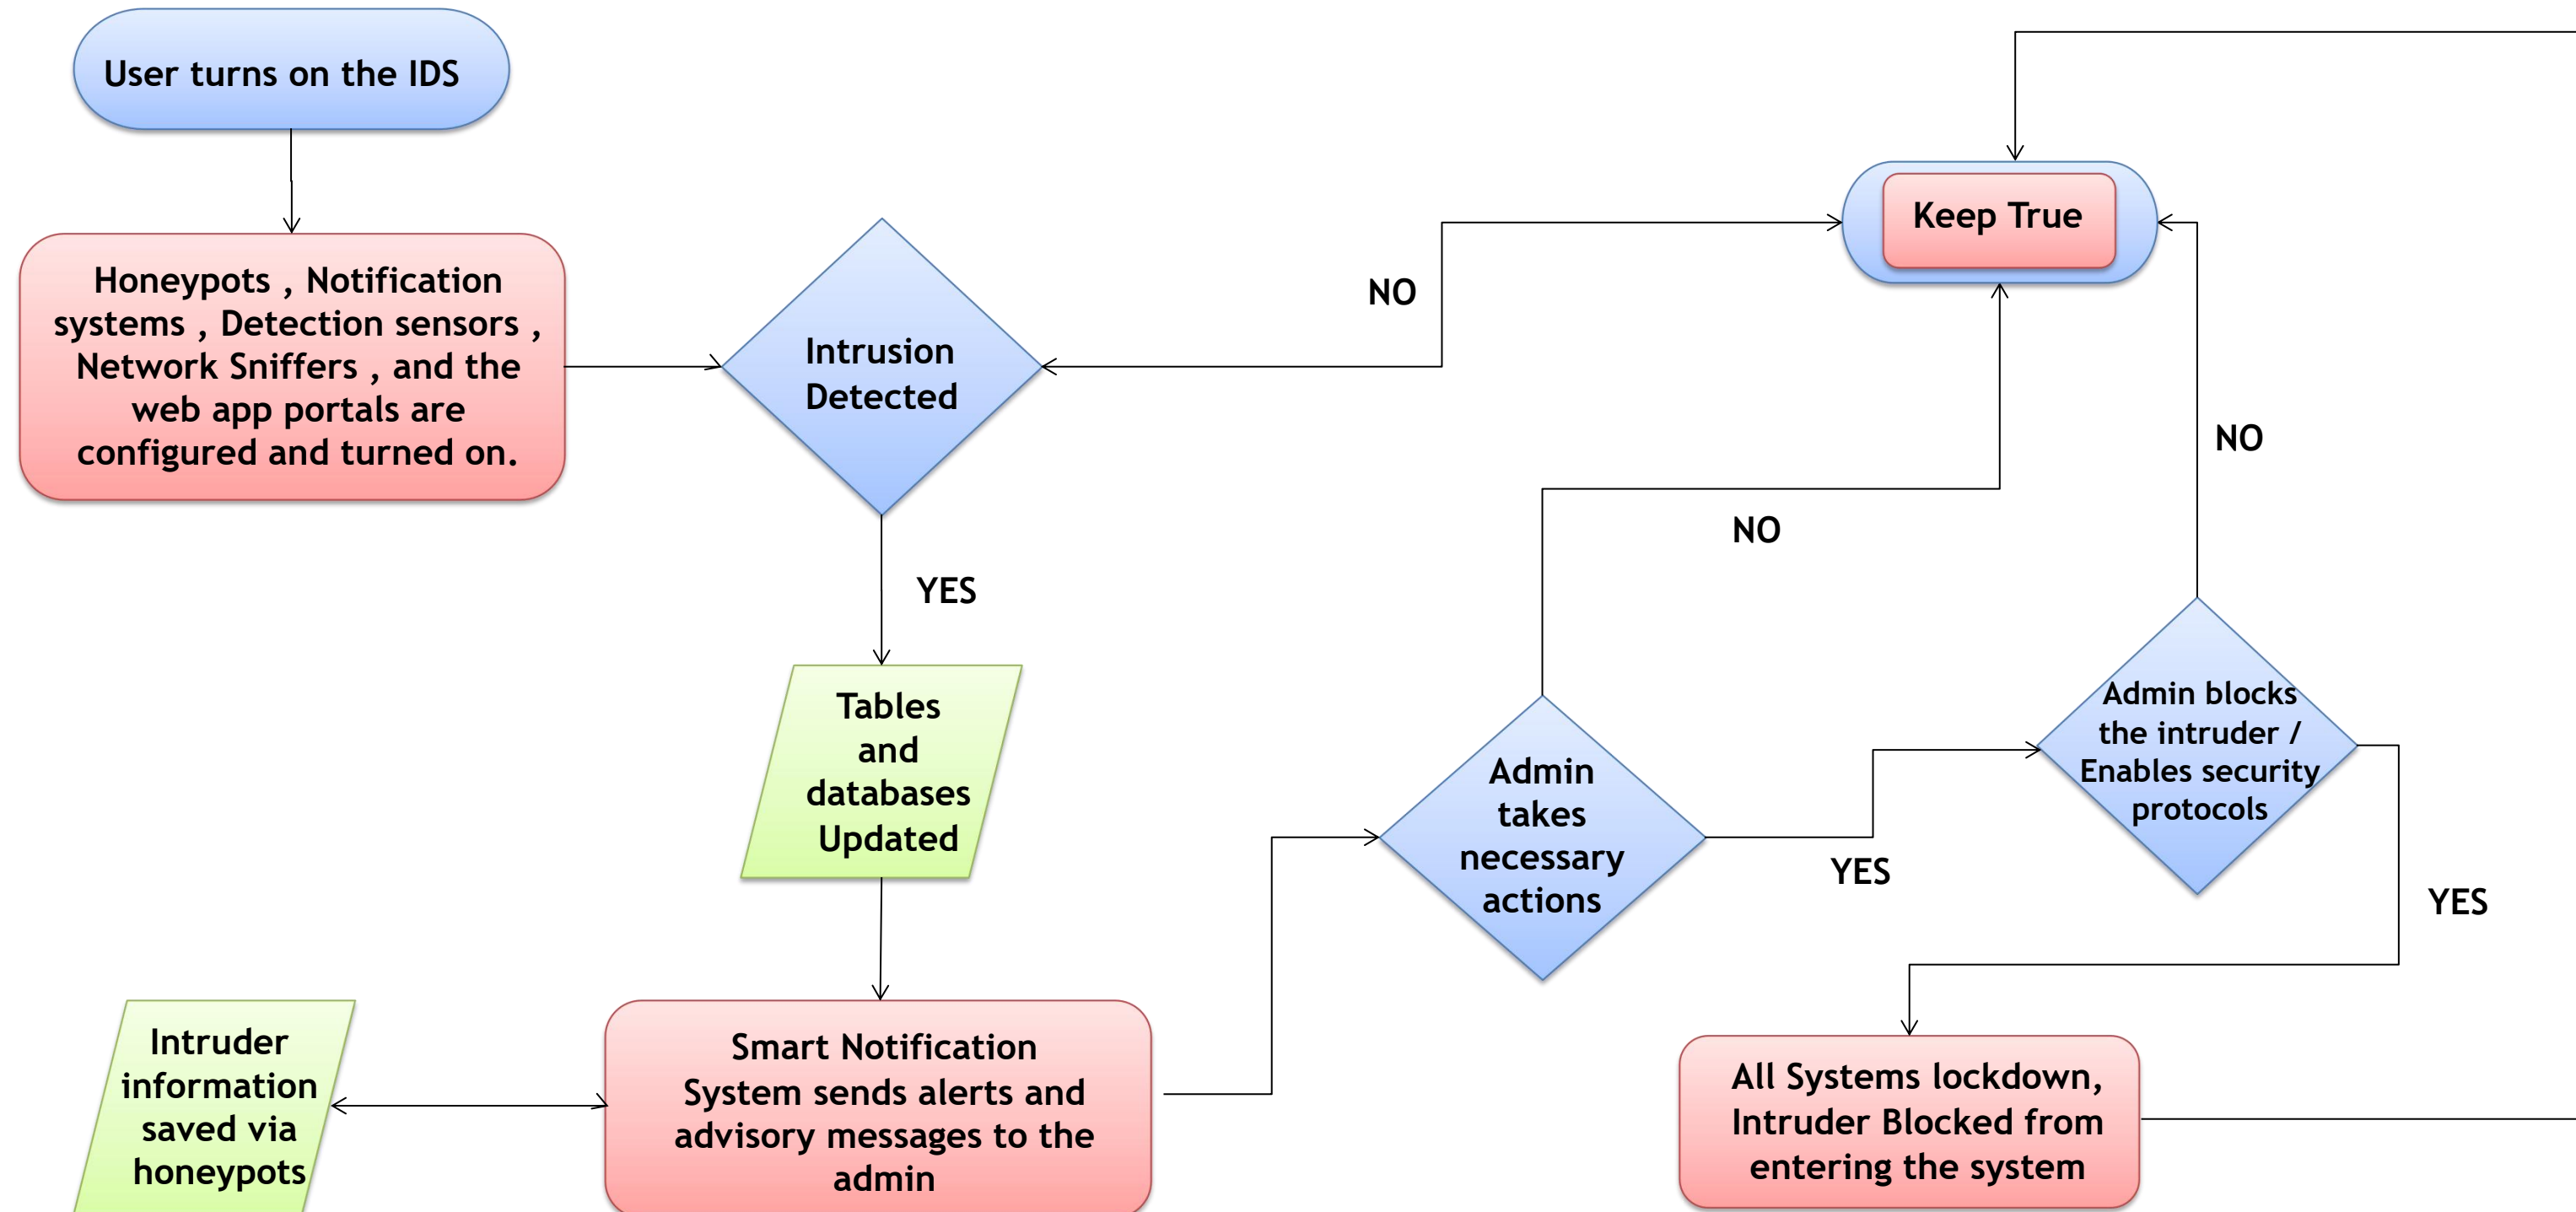

# FRAMEWORK

# NETWORK GATEWAY DASHBOARD

## Features

- \* Login functionality
- \* Network IP
- \* Network Speed
- \* ISP
- \* Network Latency
- \* Router's IP
- \* DNS IP
- \* Apache2 Network Load Balancing

Test it Out  
on your  
device:

# HONEYPOT SYSTEM

Features

- \* Decoy Vulnerable FTP server
- \* Flag based Tracking
- \* Type of attack vector identification
- \* Attack vector Location
- \* Attacker IP address
- \* Realtime network monitoring

Country	IN
City	Jammu
Region	Jammu and Kashmir
Organisation	AS55836 Reliance Jio Infocomm Limited
Tor	
Known Exit Node	False
Basic Info	

Test it Out  
on your  
device:

# IOT MODULES

## Features

- \* Cheap , Sustainable hardware

- \*

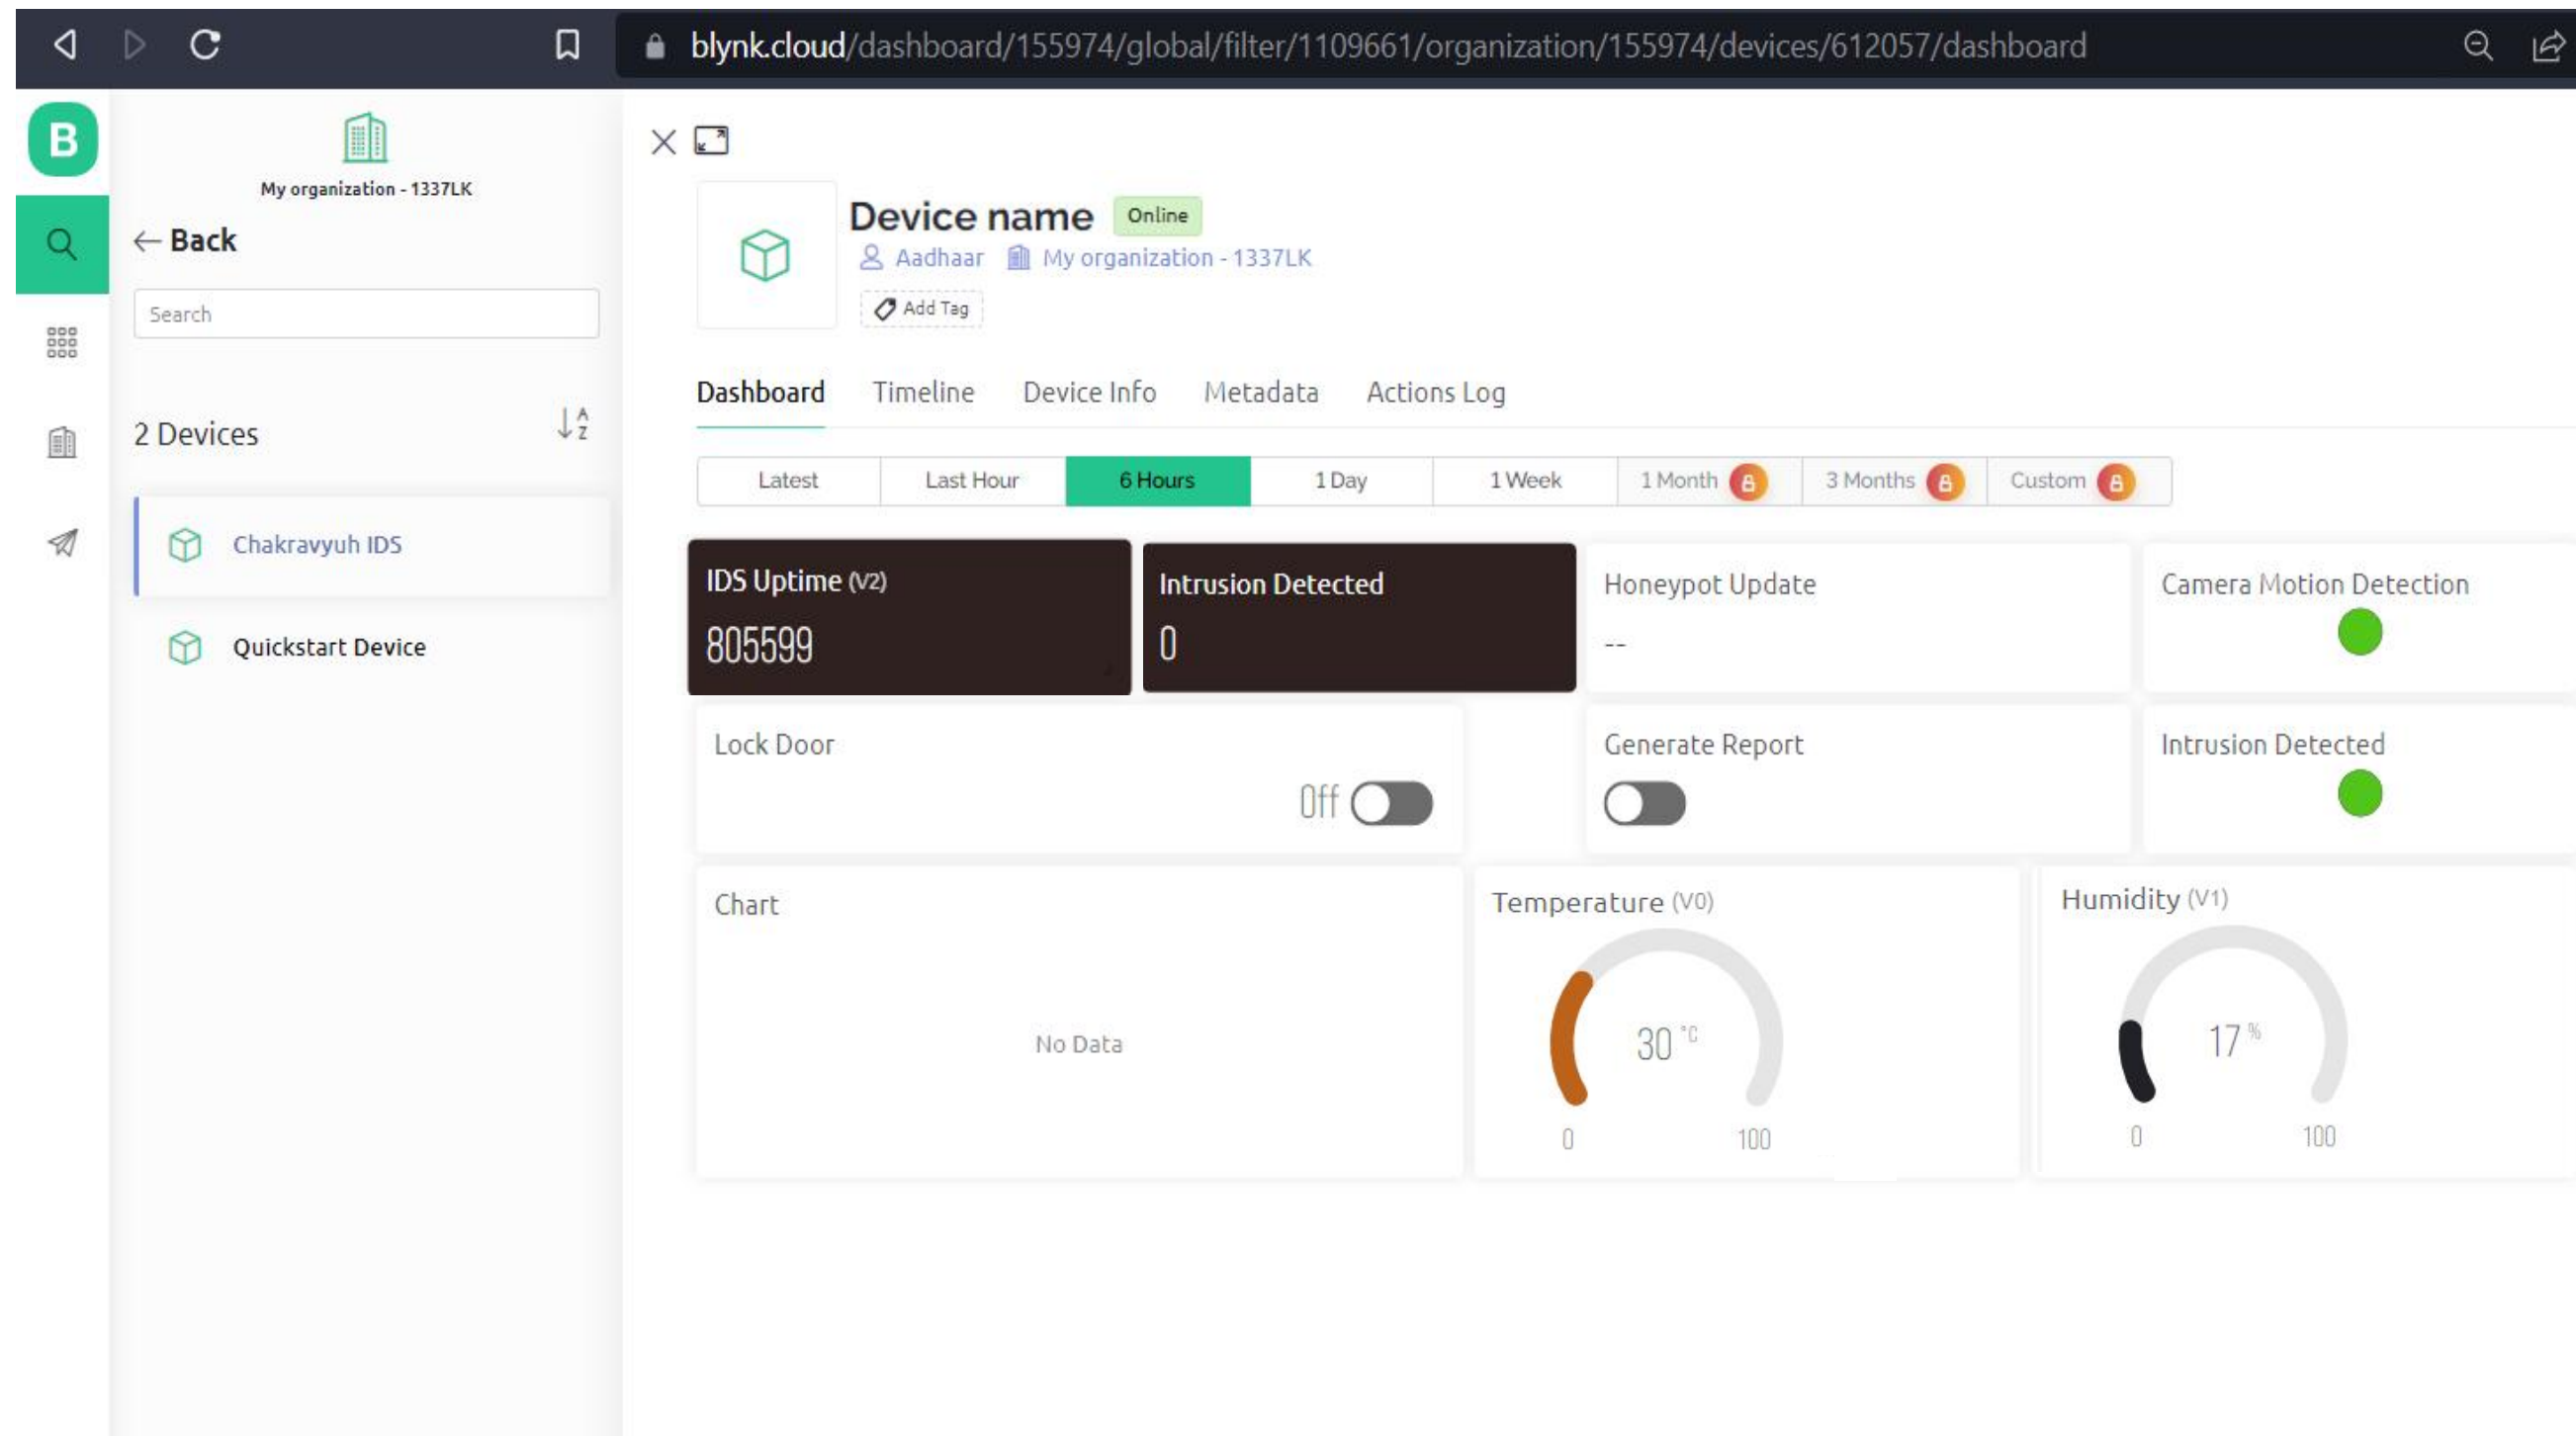

Test it Out  
on your  
device:

# BLYNK CLOUD DASHBOARD

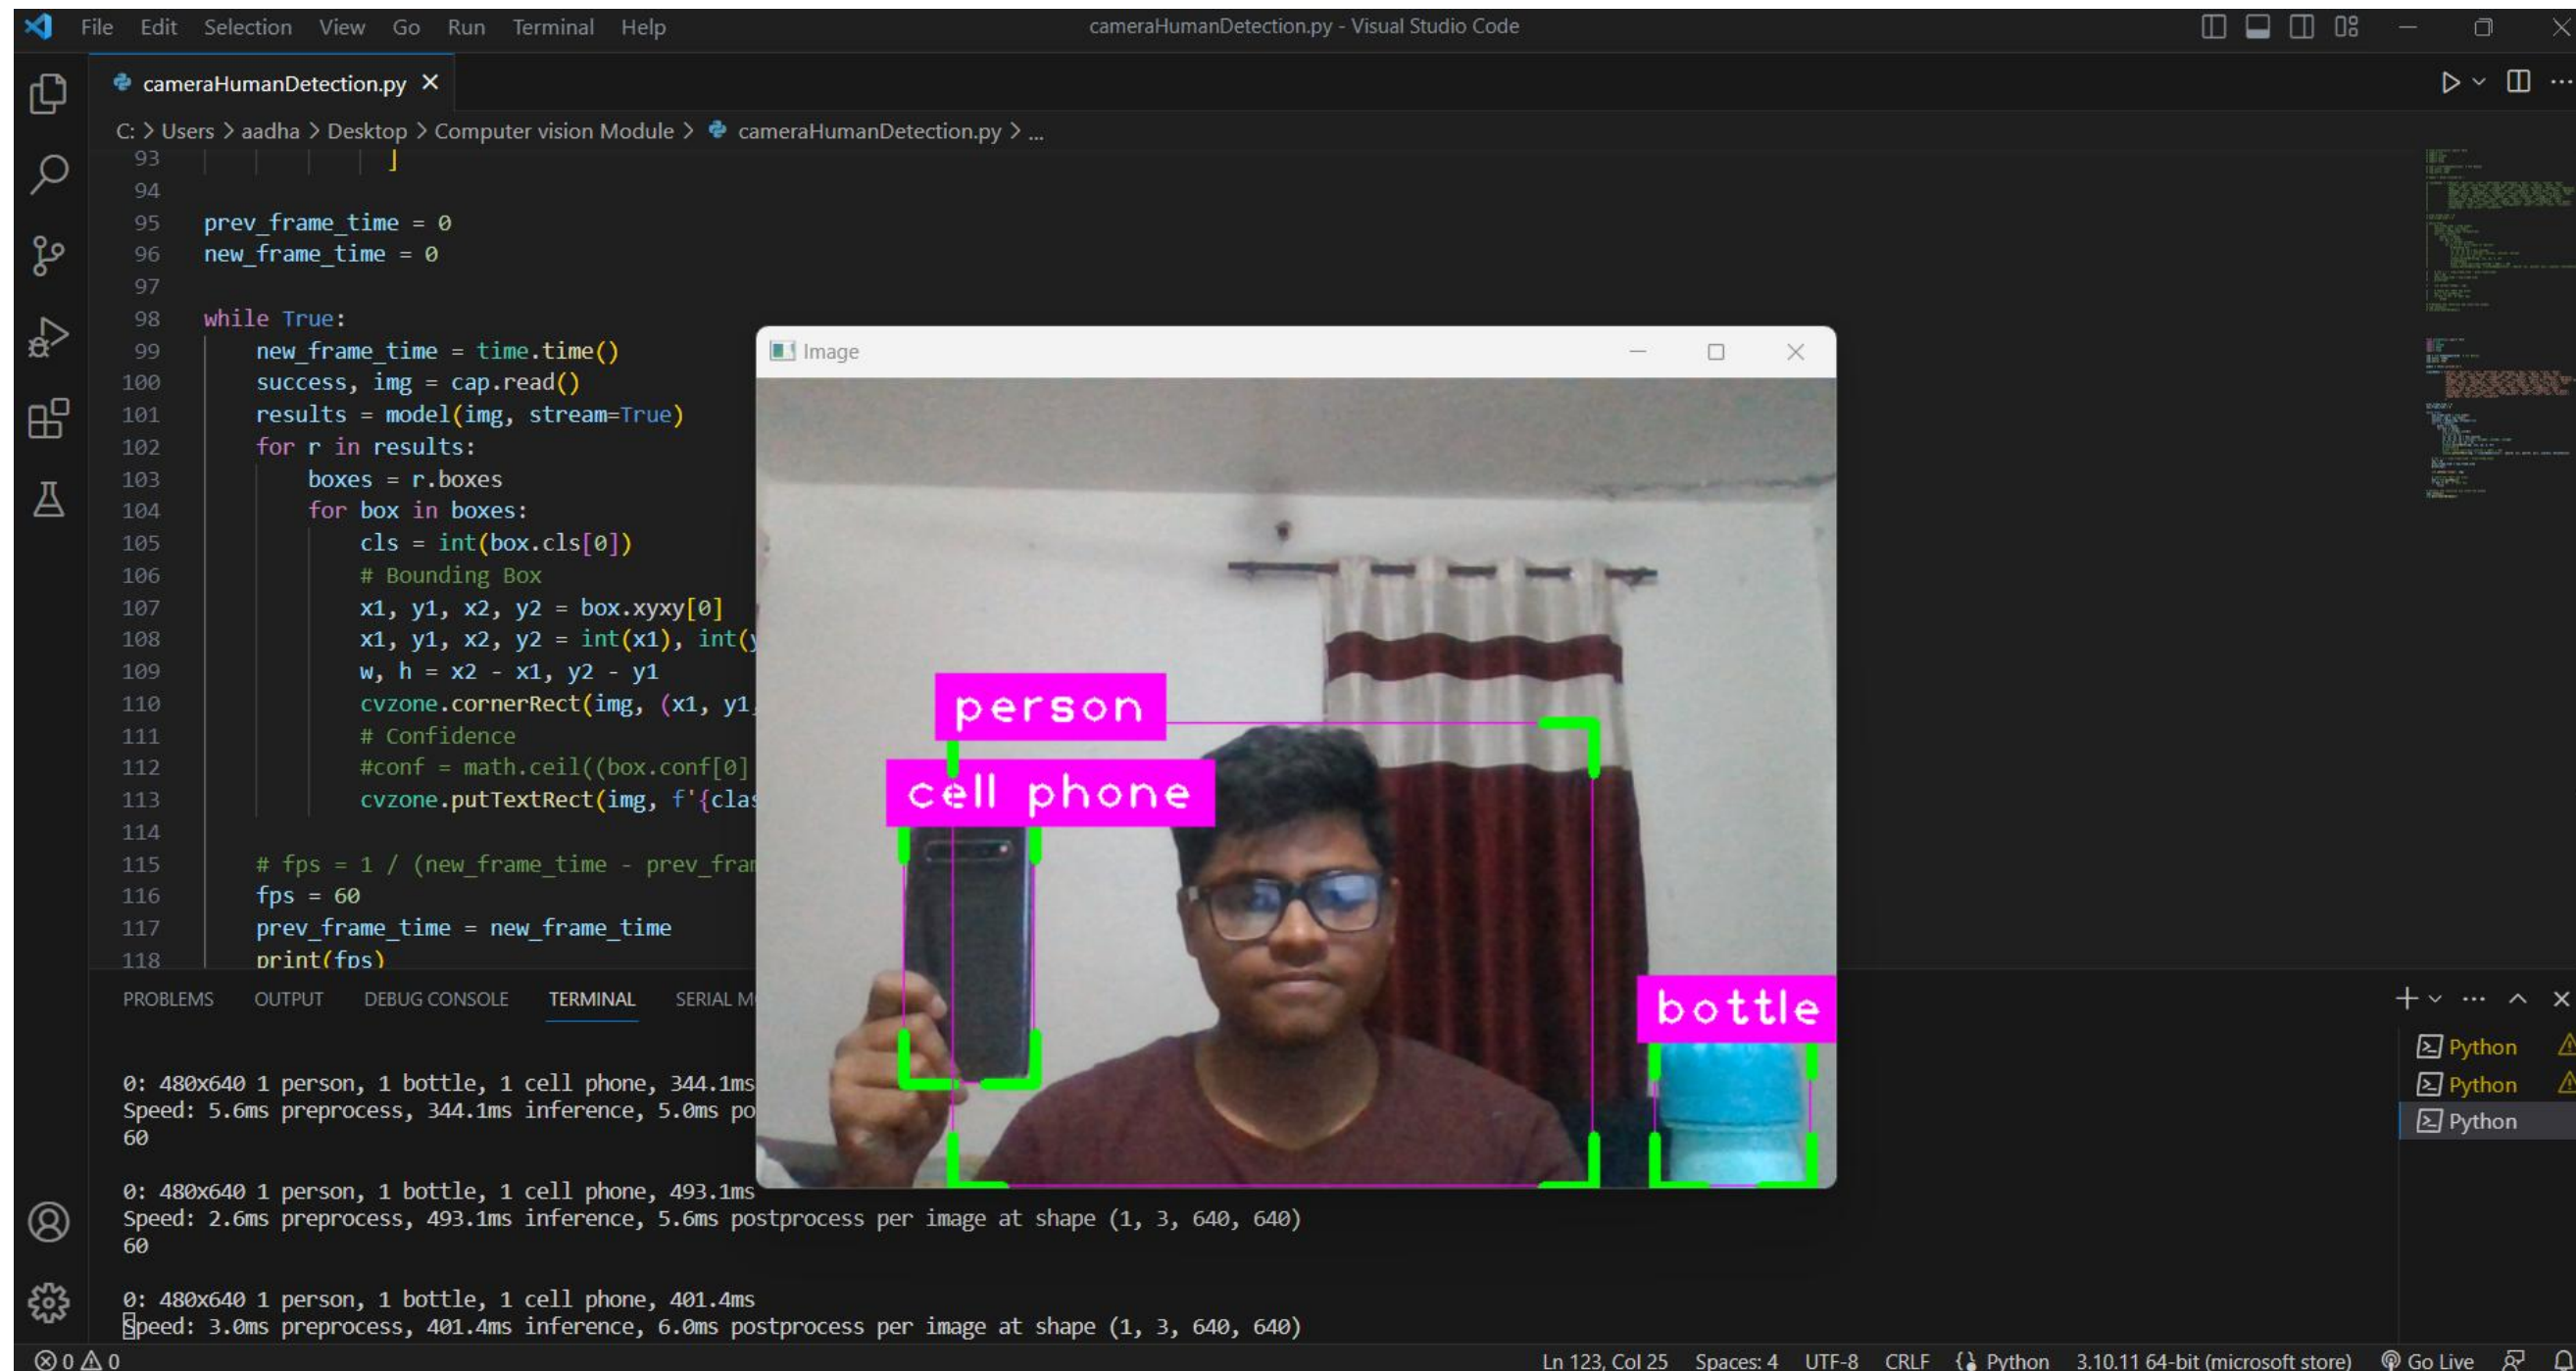

## Features

- \* Real time sensor readings
- \* Seamless UI
- \* Integratable API Key
- \* Mobile and Web based platforms available
- \* Drag and Drop Modular / admin dashboard
- \* Receive real time push and email notifications.
- \* Add and control multiple devices in a single go.

Test it Out  
on your  
device:

# COMPUTER VISION MODULE

## Features

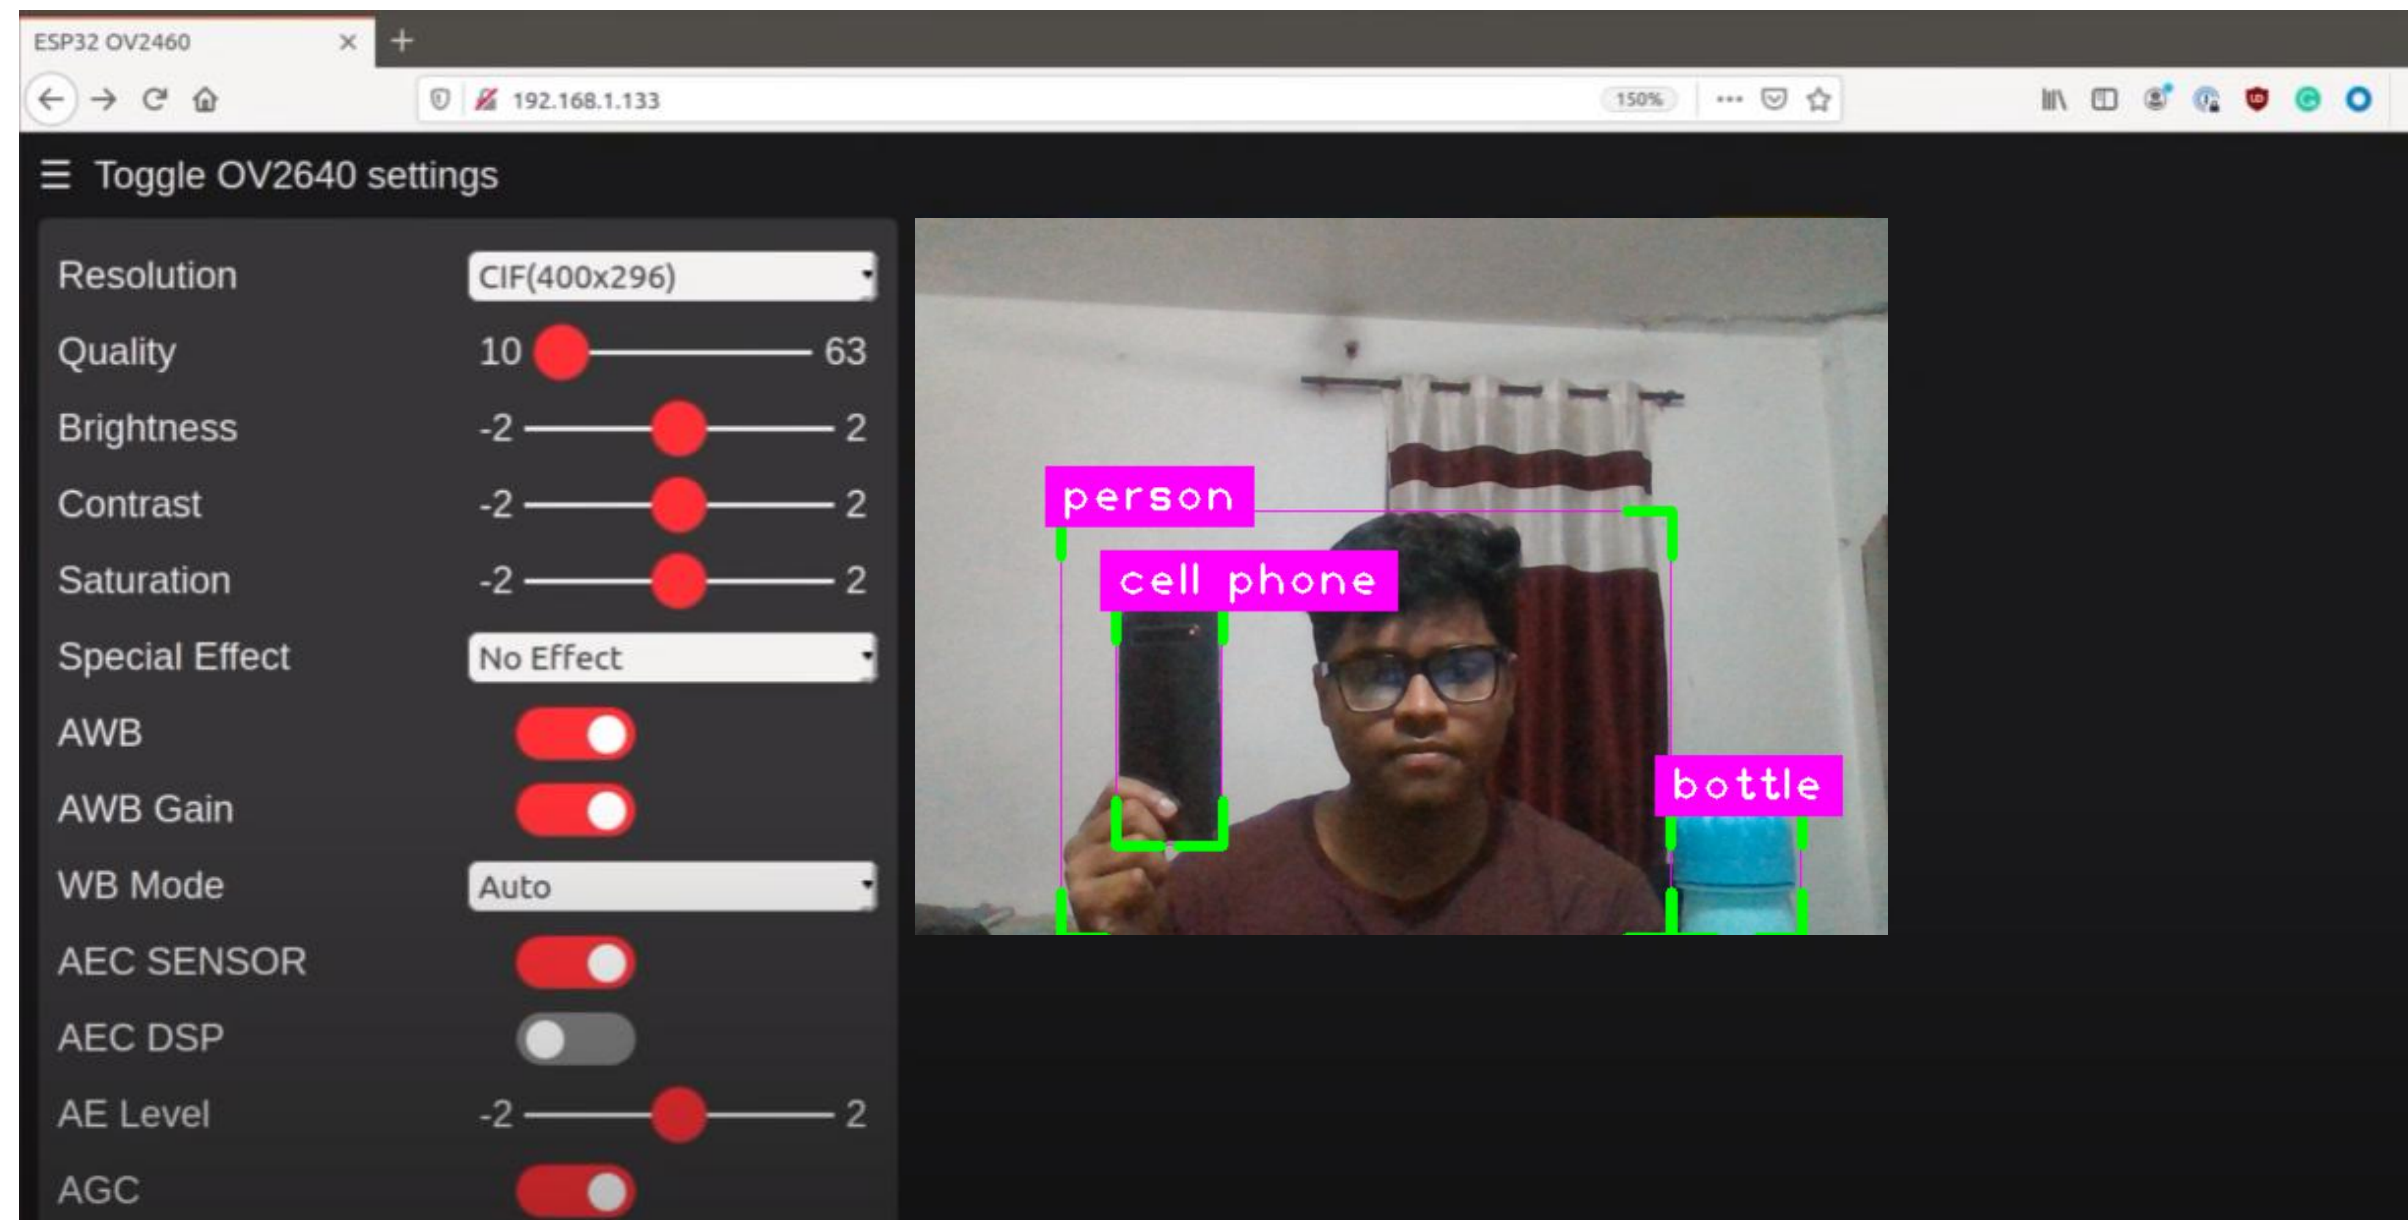

- \* Login functionality
- \* Network IP
- \* Network Speed
- \* ISP
- \* Network Latency
- \* Router's IP
- \* DNS IP
- \* Apache2 Network Load Balancing

Test it Out  
on your  
device:

# SURVEILLANCE DASHBOARD

## Features

- \* Login functionality
- \* Network IP
- \* Network Speed
- \* ISP
- \* Network Latency
- \* Router's IP
- \* DNS IP
- \* Apache2 Network Load Balancing

Test it Out  
on your  
device:

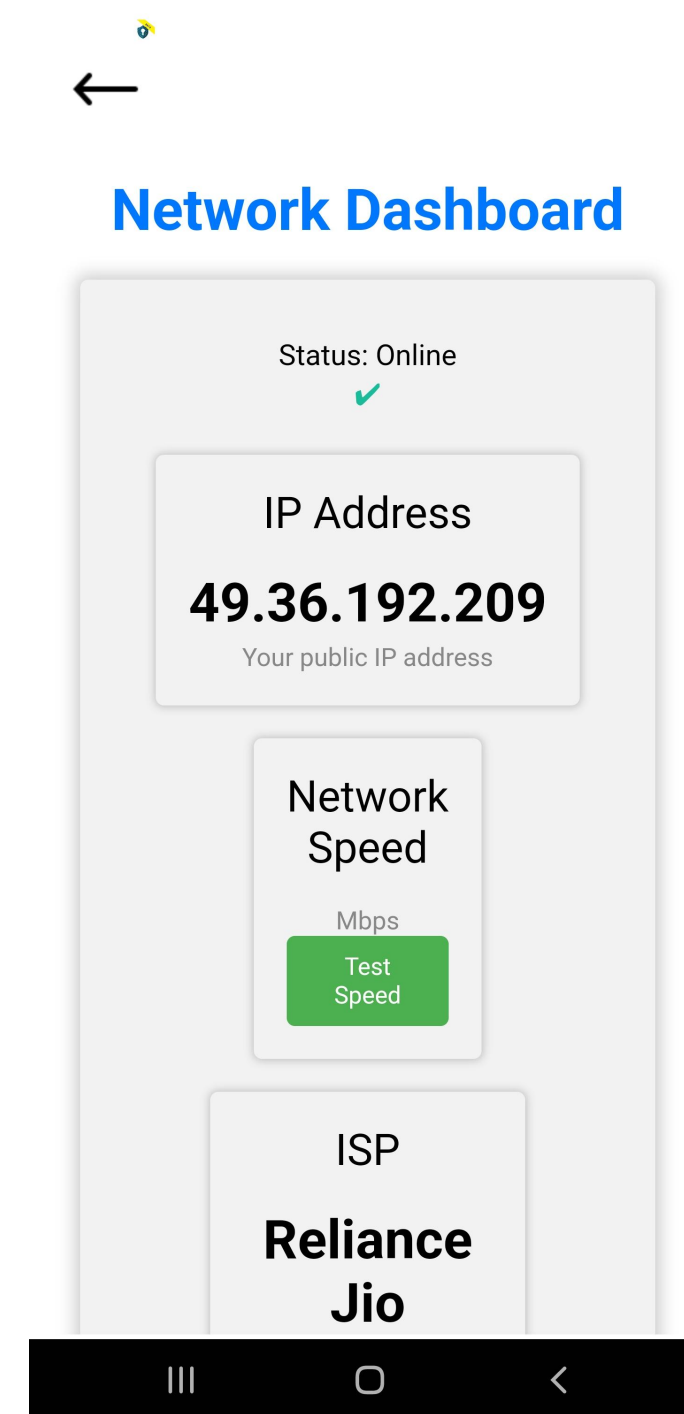

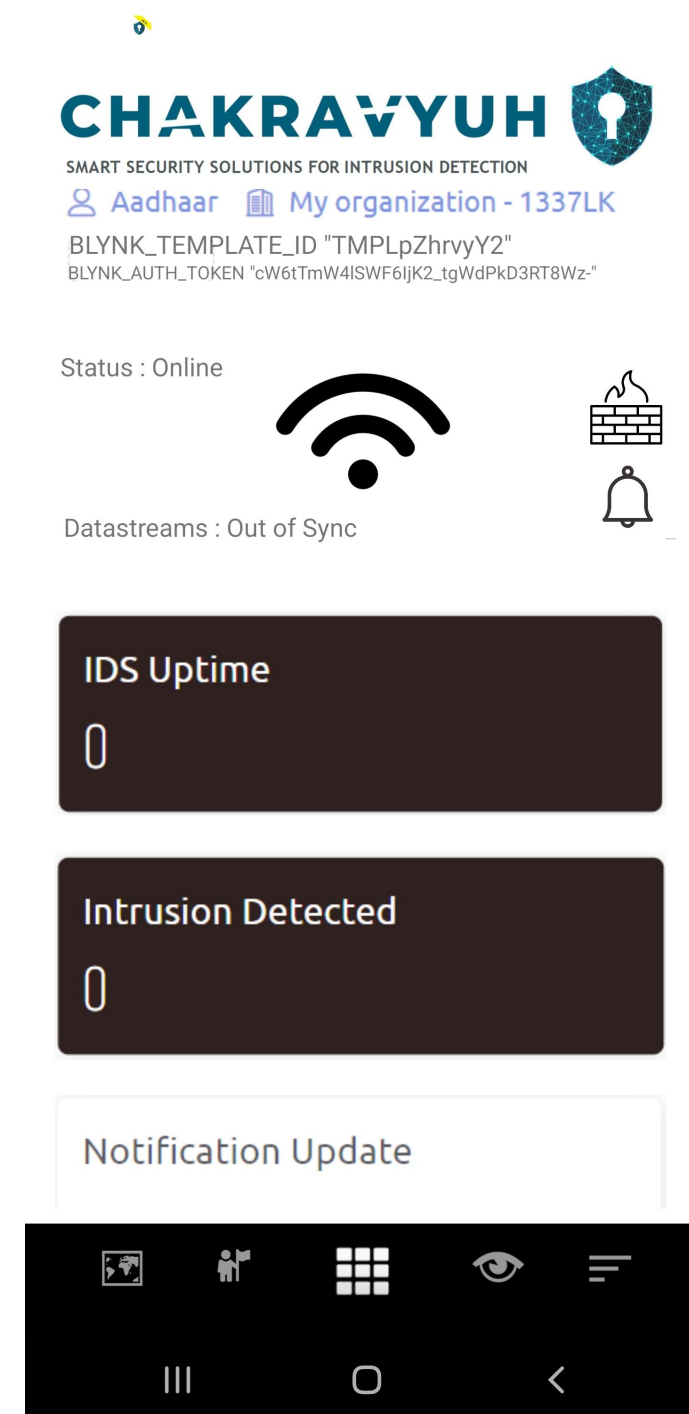

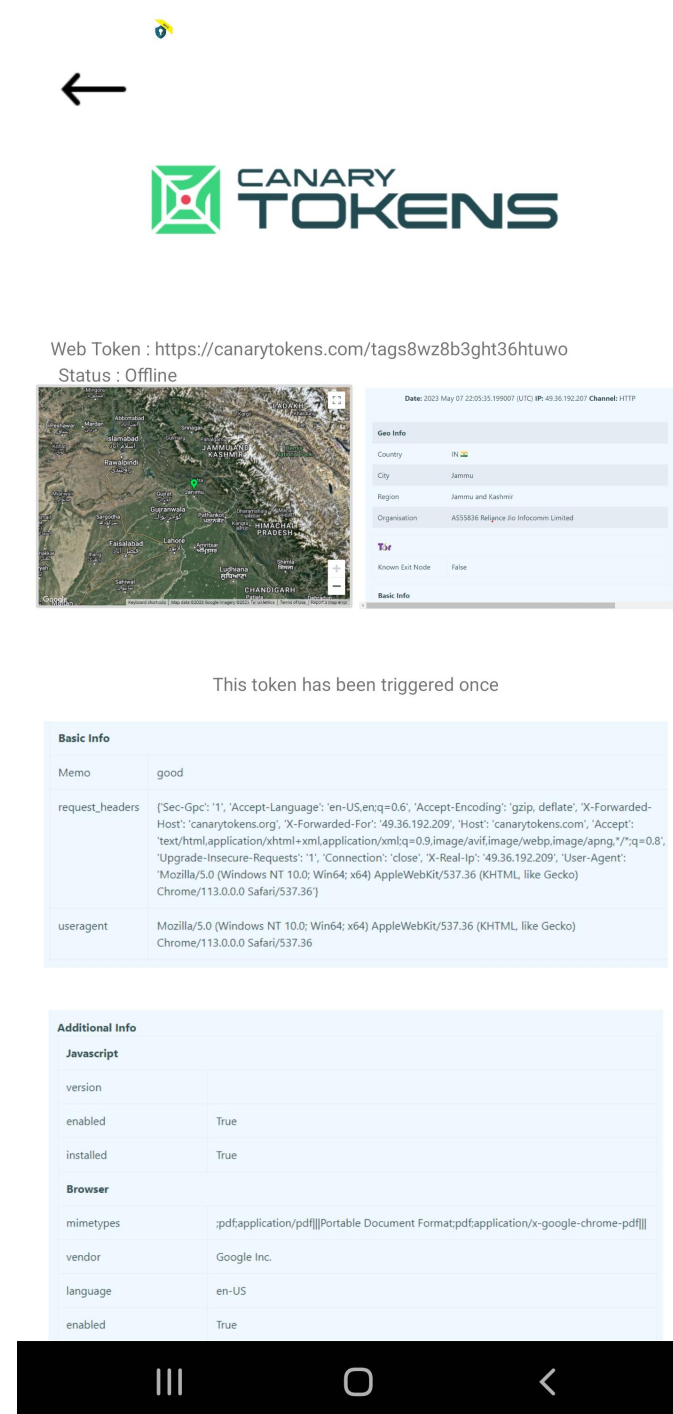

# Traction

Where is your company currently at? Visualize with a graph to highlight significant developments.

# ADMIN CONTROL APPLICATION

## Features

- \* Real time Sensor Readings
- \* Push Notificatrions
- \* Seamless Interface
- \* Admin Login Functionality
- \* Supported version of Android6.0 and Above
- \* Analytical report Dashboard
- \* Remote access functionality
- \* AR control Functionality

Test it Out  
on your  
device:

# Target Market

- ◆ General Public
- ◆ Government Agencies
- ◆ Companies / Enterprises
- ◆ Large Scale Industries
- ◆ Small scale Industries

# Direct Competitors

- ◆ McAfee Host IPS
- ◆ Cisco IDS /IPS
- ◆ McAfee Host IPS

# Indirect Competitors

- ◆ CylancePROTECT
- ◆ CrowdS trike Falcon
- ◆ Check Point Firewall

# DEMONSTRATION

# DEPLOYMENTS

# Future Roadmap

What are your next steps and goals?  
How much support do you need from  
investors, and what will it get you?

## Step 1

Increased Use of AI and  
Machine Learning

## Step 2

Integration with Cloud-  
Based Security

## Step 3

Expansion of IoT  
Security

## Step 4

Embedded AR  
functionality

# Meet our Team
